

NOTES:

Data collected on 7th September, 2024. 70787 soundings collected using SBES. Soundings typically recording depths every 0.75m with vertical lines less than 200m apart with side scan monitoring 30m either side. Data reduced to chart datum by kind permission of the PLA, using the Walton Tide Gauge and UKHO co-tidal chart NP249.

Grid system is WGS84, Mercator Projection EPSG3395.

Data was collected on leisure equipment. Whilst every care has been taken in the preparation of this chartlet, it cannot be guaranteed that depths will remain.
